1 The first step: getting access

1.1 Registering into the tutor-web as a student

1.1.1 Handout

Your first step should be to register as a student and then log in.

1.2 Check out the system

1.2.1 Handout

Look at some material, browse the tutorials and so forth.

1.3 The drills

1.3.1 Handout

Try out some drills.

When starting, just try out something very, very easy.

For a really easy topic, start here: <http://tutor-web.net/math/math050.1/lecture10>

After you are comfortable, try out more difficult topics.

While you are on the easy topics, try to earn a high grade (well over 9.0) before moving on.
