

# Where is Gadget going?

fish610.060 EAFM Tools: Gadget

Haley Frater

April 10, 2018

## The next few steps

Gadget has most of the functionality needed for multispecies/multifleet work

It has also been linked to databases for bootstrapping

But it is too slow

Output and input is commonly through the R statistical package

The next step is to make the entire Gadget environment faster and smoothly integrated into R
